NMFS staff and members of the academic community will also be invited to participate as needed.

The criteria used by NMFS to specify the commercial and recreational organizations included the size of the membership of fishermen or dealers/processors who target swordfish or sharks, and geographic representation. NMFS has already provided preliminary, informal notifications and requests for comments about the suggested composition of the workshops in two open letters distributed via the HMS Fax network on October 10, 1995 and November 3, 1995. There was very little response to the first open letter, but subsequently NMFS has received several additional requests to attend and participate in the first workshop. Therefore, NMFS is extending the invitation to attend the first workshop to other organizations or associations that are directly involved in the Atlantic swordfish or Atlantic shark fisheries. NMFS requests that each such organization or association limit the number of representatives to one

individual and that everyone who plans to attend the workshop should notify (see **FOR FURTHER INFORMATION CONTACT**) no later than November 30, 1995. Format and representation in future workshops will be one of the agenda items for the first workshop.

In future workshops, if any organizations or individuals feel their views are not represented, and that other opportunities for providing comment and input are inadequate, they may attend all or a part of a workshop, provided they give NMFS at least 2 weeks notice so that an appropriate meeting room can be organized. Such organizations or individuals may attend the meeting as observers and/or may request a specific time slot to present their views.

Objectives and Format

The objectives of the first workshop are:

(i) *Information exchange*: What general types of limited access have previously been proposed or implemented; what are their biological, economic, social, legal and enforcement implications; what practical lessons can be learned from systems already implemented in the United States?

(ii) *Scoping of options*: Is limited access an essential part of any long-term management strategy for Atlantic swordfish and Atlantic shark fisheries; if so, what is the range of options that are relevant or viable for these fisheries?

Two other important issues that are considered beyond the scope of the workshops and will not be discussed in these workshops are the annual quotas for Atlantic swordfish and shark fisheries and allocations of annual quotas between user groups and geographic regions.

The first two workshops will include several presentations by invited speakers knowledgeable about various forms of limited access. Other speakers will be invited as the need arises. NMFS staff will also collate important background papers and summaries concerning limited access. Background documents may be provided in advance of the workshops. The workshops will use a moderated, open-discussion framework to present and discuss issues and options. At the end of each workshop, participants will discuss a preliminary agenda for the next workshop. There will be no consensus recommendation from the workshops.

NMFS staff will summarize workshop discussions as quickly as possible and disseminate them via the HMS Fax Network, and upon written or verbal request from members of the public. NMFS staff will finalize the agenda for

each upcoming workshop at least one week prior to the workshop, and disseminate it by the same means. The objectives of the workshops will not be subject to substantive change, but the format and procedures adopted to ensure orderly progress in the workshops may be modified over time.
